
MODEL - VIEW - CONTROLLER

UNDERSTANDING MVC

ARCHITECTURAL PARADIGM FOR PROGRAMMING
DESIGNED IN 1979

NOW IT IS INCREDIBLY POPULAR

USED BY MOST FRAMEWORKS

WHAT THE HELL IS MVC

- M : Model
- V : View
- C : Controller

WHAT THE HELL IS MVC

- M : Model
- V : View
- C : Controller

- Never repeat yourself

WHAT THE HELL IS MVC

- M : Model
- V : View
- C : Controller

- Never repeat yourself
- Structured Programming

HOW DOES A WEBSITE WORK?

THE FLOW

Client

HOW DOES A WEBSITE WORK?

INTERACTING WITH YOUR DATA

THE MODEL

- Adding and Retrieving Items from DB
- Processing data from or to the database
- Speaks only with the Controller

DISPLAYING TO THE USER

THE VIEW

- This is the only thing the user ever sees
- Think of good old fashioned HTML/CSS
- Speaks only with the Controller

INTERACTING WITH THE USER

CONTROLLER

- Processes GET/POST/PUT/DESTROY requests
- All server-side logic
- The Middle Man
  - Takes info from user
  - Processes info and talks to the DB if needed
  - Receives info from DB
  - Speaks to View to explain presentation to the viewer
